

Cozad Medical Ops — Prior Auth Workflow Implementation

AI-First Architecture & Engineering Scope Estimate

Client: Cozad Medical Ops | Author: Shakil Ahmed (BarakahSoft LLC) | Rate: \$150/hr | Pilot: \$250 Fixed (48-72h)
Live Prototype: <https://cozad-priorauth.vercel.app> | GitHub: <https://github.com/exelentshakil/cozad-priorauth>

Implementation Phases & Deliverables

Phase	Scope & Deliverables	Hours	Rate	Total
Phase 0: Interactive Prototype	Fully deployed demo (cozad-priorauth.vercel.app), 5-stage pipeline, deterministic rules (Medicare LCD L38924, UHC, Aetna), synthetic test cases (READY/VERIFY/EXCEPTION), EDI 278 generator.	Completed	\$0.00	INCLUDED
Phase 1: Secure Intake	Client-owned Jotform HIPAA / Typeform setup, HMAC webhook signature verification, clinical notes ingestion parser, synthetic test harness.	6h	\$150/h	\$900
Phase 2: AI Extraction & BAA	OpenAI Enterprise / Bedrock Claude with executed BAA, strict Zod JSON Schema extraction (zero manual staff prompts), zero data retention config.	7h	\$150/h	\$1,050
Phase 3: Payer Rules Engine	Deterministic evaluation logic for LCD L38924, UHC, Aetna, Cigna. READY / VERIFY / EXCEPTION classifier, automated Physician Query letter generator.	8h	\$150/h	\$1,200
Phase 4: Workspace Board	Airtable / ClickUp visual triage board setup, automated webhook stage advancement, 1-click verification triggers, Slack/email notifications.	7h	\$150/h	\$1,050
Phase 5: Submission & Action	Electronic EDI 278 transaction packager, CoverMyMeds/Availity clearinghouse API dispatch, pre-filled payer portal copy kit, tracking listener.	6h	\$150/h	\$900
Phase 6: UAT & Handoff	Comprehensive UAT with 15+ synthetic clinical cases, video walkthrough, SOP admin runbooks, 14-day hypercare support.	5h	\$150/h	\$750
TOTAL	Full Turnkey Turnaround (2 Weeks)	39h	\$150/h	\$5,850

Engagement Options & Delivery Cadence

Option A: Pilot Milestone (48-72 Hours) - Connects intake form to LLM extraction engine and Airtable board. - Demonstrates READY, VERIFY, and EXCEPTION with synthetic patient data. - Delivers SaaS subscription blueprint & initial SOP documentation. Investment: \$250.00 Fixed	Option B: Complete Turnkey Implementation (2 Weeks) - Full 39-hour scope across all 6 phases. - Live EHR intake webhook, BAA-backed OpenAI/Bedrock, Airtable sync. - EDI 278 generation, staff training, and 14 days hypercare. Investment: \$5,850.00 (Milestone-based)
---	--

Client-Owned SaaS Subscriptions (Zero Lock-In)

Component	Recommended SaaS Tool	Est. Cost	Why Needed / Justification
Intake	Jotform HIPAA / Typeform	\$39-\$99/mo	Encrypted patient document ingestion with signed BAA.
Automation	Make.com Pro / Inngest	\$16-\$29/mo	Webhook orchestration, retries, and board sync.
AI Engine	OpenAI Enterprise (BAA)	\$15-\$35/mo	Zero data retention structured extraction (~\$0.01/case).
Workspace	Airtable Team (2 seats)	\$40/mo	Visual triage board for READY / VERIFY / EXCEPTION.

Component	Recommended SaaS Tool	Est. Cost	Why Needed / Justification
Hosting & API	Vercel Pro	\$20/mo	Deterministic rules engine & EDI 278 dispatcher.
